P100-2AST	Sliding Bracket (AST)

Materials

Housing: cast aluminum
Cable: black polyester
Post: aluminum

Features and Benefits

- **Easy to use** – the spring-loaded reel and stretch-resistant cable provide smooth and steady tension throughout hose extension and return.
- **Field adjustable for various hose, nozzle, swivel, breakaway combinations** – no need for upgrading components if a breakaway or swivel is added to the hose assembly. Simply change the tension setting on the spring-loaded hose reel.
- **Multiple mounting options** – the POMECO 102 retractor housing is tapped on the top for bolting to overhead crossbars, and on the side for mounting to vertical posts. The 102 is available as a retractor kit (including post, retractor and mounting hardware) or as separate components. Models are also available for aboveground storage tank (AST) applications. AST models include a 44" (112 cm) post with a freestanding base and an optional nozzle hook/hood kit.
- **Easy to maintain** – the removable sideplate provides full access to the mechanism for easy tension adjustment and unit maintenance. A convenient safety thumb screw is provided to lock the reel in place during tension adjustment.

POMECO 102 SPRING BALANCE MPD HOSE RETRACTOR PACKAGES

POMECO 102 Spring Balance MPD Hose Retractors keep excess hose off the ground and out of the way, prolonging hose life and preventing extra Length hoses from cluttering the island. The 102 MPD hose retractors are especially well-suited for use on Multiple Product Dispensers (MPD) with Stage II Vapor Recovery hose/nozzle assemblies. The POMECO 102 is a California Air Resource Board (CARB) certified Stage II component for use with MPDs as per Executive Order G-70-52-AM.

Features and Benefits

- **Easy to install** – each model number designates a custom designed retractor package that mounts in the canopy of a particular manufacturer's MPD. Packages are shipped complete with the appropriate number of retractors and all the necessary mounting hardware for a clean, professional installation
- **Easy to use** – the spring-loaded reels and stretch-resistant cables provide smooth and steady tension throughout hose extension and return.
- **Easy to maintain** – the removable sideplate provides full access to the mechanism for easy tension adjustment and unit maintenance. A convenient safety thumb screw is provided on each retractor to lock the reel in place during tension adjustment.

POMECO 100 COUNTERWEIGHT HOSE RETRACTORS

POMECO 100 Counterweight Hose Retractors keep excess hose off the ground and out of the way, prolonging hose life and reducing potential hazards. The POMECO 100 is a California Air Resource Board (CARB) certified Stage II component for use with single and dual hose dispensers as per Executive Order G-70-52-AM.

Materials

Housing: impact resistant plastic

Cable: black polyester

Post: aluminum (2" x 2")

Features and Benefits

- **Easy to use** – counterweights are precisely matched to each hose configuration to ensure that a minimal pulling force is needed throughout hose extension.
- **Easy to maintain** – the 100 has just two moving parts, ensuring a long service life with a minimum amount of maintenance.
- **Multiple hose configurations** – the 100 is available in a multitude of configurations to meet virtually any conventional or vapor recovery hose/nozzle configuration. Models are also available for air and water hose applications to keep hoses clear of vehicles when not in use. The T-Top Air/Water model separates the hoses allowing one hose to be used while the other remains safely out of the way.

POMECO VAPOR RECOVERY NOZZLE HOOD ASSEMBLIES

POMECO Vapor Recovery Nozzle Hood Assemblies provide a convenient means to convert conventional dispensers to accommodate Stage II vapor recovery nozzles.

- **Nozzle protection** – the hood helps protect the vapor recover nozzle spout and sealing surface from the weather and rigors of everyday use.
- **Operating handle** – meets Bureau of Weights and Measurements requirements.
- **Models to accommodate virtually any dispenser/nozzle combination** – the aluminum backplate is drilled to exact specifications for each dispenser model. Operating handles and nozzle hooks are custom designed to fit the particular dispenser and nozzle.
- **Easy to install** – shipped complete with all necessary hardware And installation instructions.

Materials

Hood: Duratuff® or aluminum

Backplate: aluminum

Operating Handle: aluminum – not included

Nozzle Hook: aluminum – not included
